Author Index to 1988

Bian Baigui
——Wang Yanru; Shi Jun
Solubilities of hydrogen chloride and chlorometane in 1,2,4-trimethylbenzene 47
Boelhouwer C. see Xu Xiaoding 98
Chen Chiayong see Chen Zhubao 216
Chen Hongfang see Xu Xien 57
Chen Shuzhen see Cheng Naiyi 38
Chen Zhongxiu see Wu Zhaoli 185
Chen Zhubao
—— Yang Shouzhi; Chen Chiayong
Mathematical modeling of non-catalytic liquid-solid reaction and its solution by orthogonal collocation 216
Cheng Naiyi
—— Feng Shiyi; Chen Shuzhen; Han Shouzu; Gao Chiao; Wu Xijun
A new simulating optimization approach——Computer-aided operating optimization for existing chemical processes 38
Du Yingsheng
—— Zhao Ruwen; Jin Lei; Wang Shichang; Yu Guocong
Start-up process dynamics of plate distillation columns 1
Fang Zhirong see Ye Yongheng 229
Feng Shiyi see Cheng Naiyi 38
Fokkens R. H. see Xu Xiaoding 98
Gao Chiao see Cheng Naiyi 38
Guo Yiazhu see Lu Guangzhong 124
Han Shouzu see Cheng Naiyi 38
Hanratty Thomas J. see Mao Zhuoxiong 131
Hou Yufen see Zhang Yingju 281
Hu Ying
—— Xu Yingnian; Prausnitz J. M.
Molecular thermodynamics of gas solubility (I) Henry's constants of gases in nonpolar solvents 144
see Xu Yingnian 163
Huang Guozhang see Lu Guanzhong 124
Huang Hongding
—— Lu Wei
Application of "vapor-phase resistance method" to the study on condensation in horizontal tubes 86
Jiang Guoliang see Zhu Baolin 196
Jin Lei see Du Yingsheng 1
Li Qi see Xie Yusheng 242
Li Shaofen see Yang Jin 11, 23
Lin Jifang see Zhang Dongchang 253, 263, 272
Lin Zaiqi see Zhang Dongchang 253, 263, 272
Liu Guojie see Xu Yingnian 163
Liu Jiaqi
—— Zhang Jianhou
Determination, correlation and prediction of liquid-liquid equilibrium data of *n*-butyl alcohol-water-butyl acetate ternary system 111
Lu Guangzhong
—— Huang Guozhang; Guo Yiazhu; Wang Ren; Zhu Ronghua; Qi Hegan
Preparation of ethylene glycol acetate through catalytic oxidation of ethylene——One-step process with simultaneous introduction of oxygen and ethylene into a Pd-Cu catalytic solution 124
Lu Wei see Huang Hongding 86
Mao Zhuoxiong
—— Hanratty Thomas J.

Measurement of turbulent fluctuations of velocity gradient on the wall with a pair of semicircular electrodes 121
Mol J. C. see Xu Xiaoding 98
Nibbering N. M. M. see Xu Xiaoding 98
Prausnitz J. M. see Hu Ying 144
Qi Hegan see Lu Guangzhong 124
Qin Jiguang see Xie Yusheng 242
Shi Jifen see Ye Yongheng 229
Shi Jun see Bian Baigui 47
Shou Zhanggen see Wu Zhaoli 185
Wang Ren see Lu Guangzhong 124
Wang Shichang see Du Yingsheng 1
Wang Shuying see Zhang Zeting 294, 303
Wang Yanru see Bian Baigui 47
Wen Hao
—— Xu Zhihong
Prediction of vapor–liquid equilibria using UNIFAC by on–line processing parameters 104
Wu Xijun see Cheng Naiyi 38
Wu Zhaoli
—— Chen Zhongxiu; Shou Zhanggen; Zhu Shiping
Isobaric vapor–liquid equilibrium of isobutene–isoprene–chloromethane system at 1.03 MPa 185
Xie Yusheng
—— Li QI: Qin Jiguang; Zhang Heng
A new correlation for the transport disengaging height (TDH) of fluidized bed 242
Xu Xiaoding
—— Boelhouwer C.; Mol J. C.; Fokkens R. H.; Nibbering N. M. M.
Surface species on Re_2O_7/Al_2O_3 metathesis catalysts——A fast atom bombardment mass spectrometry study 98
Xu Xien
—— Chen Hongfang
Simulation of distillation processes with reactions in series 57
Xu Yingnian
—— Hu Ying; Liu Guojie
Molecular thermodynamics of gas solubility (II) Henry's constants of gas in polar solvents and 1–1 type electrolytic solutions 163
see Hu Ying 144
Xu Zhihong see Wen Hao 104
Yang Jin
—— Li Shaofen
Approximate analytical solution of effectiveness factor for porous catalyst
(I) Approximate expression 11
(II) Comparison of approximate analytical solution with numerical solution 23
Yang Shouzhi see Chen Zhubao 216
Ye Yongheng
—— Fang Zhirong; Shi Jifen
The vertical density profiles of two–phase mixture and the flow regime transition on sieve trays 229
Yu Guocong see Du Yingsheng 1; Zhang Zeting 294, 303
Zhang Dongchang
—— Lin Zaiqi; Lin Jifang
A new method for achieving dropwise condensation
(I) Basic concept and experimental results 253
(II) New surface materials for dropwise condensation 263
(III) Determination of dropwise condensation heat transfer coefficient and life–time test of the new surface 272
Zhang Heng see Xie Yusheng 242
Zhang Jianhou see Liu Jiaqi 111

Zhang Xianrun
Bubble formation frequency study in a single-jet gas-solid fluidized bed 70
Zhang Yingju
—— Hou Yufen
Reactive disperse dyes for synthetic polymer fibres and their blends with natural fibre (III) The dyeing mechanism of reactive disperse dyes containing β-hydroxyethyl sulphonyl sulphuric ester group for polyester-cotton blend
Zhang Zeting
—— Wang Shuying; Yu Guocong
Study on liquid phase mixing in packed column
(I) A pseudo-one-dimensional model 294
(II) A two-dimensional model 303
Zhao Ruwen see Du Yingsheng 1
Zhu Baolin
—— Jiang Guoliang
Calculation method for evaluating the separation performances of hollow-fiber membrane N_2-H_2 separators 196
Zhu Ronghua see Lu Guangzhong 124
Zhu Shiping see Wu Zhaoli 185
